Career Objective

Enthusiastic third-year B.Tech student in Artificial Intelligence and Data Science at PSG Institute of Technology and Applied Research, seeking a summer internship to apply and expand my skills in AI, machine learning, and data analytics. Passionate about developing data-driven solutions, I aim to contribute to organizational growth through innovative thinking, problem-solving, and impactful insights.

Education

B.Tech - Artificial Intelligence & Data Science PSG Institute of Technology and Applied Research, Coimbatore (2022 - Present) |

CGPA: 7.67/10

HSC - Bio-Maths cheran vidhyalaya metric higher secondary school (2022) | Percentage: 95.5%(569/600)

TECHNICAL SKILLS

ProgrammingLanguages: Python, C, HTML ,**Database:** MySQL,SQL ,**AI/ML:** Machine Learning, Deep Learning, NLP, Computer ,**Frameworks & Tools:** TensorFlow, Scikit-learn, OpenCV, Google Colab,**Soft Skills:** Analytical Thinking, Teamwork, Communication, Creativity

Internship

Cloud Management Intern – Outrix (15 aug - 15 sep'2025)

Worked on AWS and Azure for website hosting, serverless applications (Lambda + API Gateway), and VM deployment, gaining practical experience in cloud infrastructure and deployment workflows.

Projects

1. Autism Prediction Using Machine Learning

Developed a machine learning-based system for early detection of Autism Spectrum Disorder (ASD) in children.

- Designed a structured, parent-friendly questionnaire to collect behavioral, communication, and medical history data.
- Applied classification algorithms to analyze patterns and predict ASD likelihood.
- Improved early diagnosis support through data-driven insights for timely intervention.

2. Brain Tumor Detection Using Deep Learning

Built a deep learning model for automated detection of brain tumors from MRI images.

- Implemented Convolutional Neural Networks (CNNs) for image classification and tumor segmentation.
- Performed data preprocessing and augmentation to enhance model accuracy and generalization.
- Reduced manual diagnostic effort and improved efficiency in clinical analysis.

3. Smart Lecture Video Analysis System

Developed an AI-based system to analyze lecture videos and extract meaningful insights for improved learning.

- Utilized computer vision and audio processing techniques to analyze student engagement and lecture content.
- Implemented speech-to-text models to transcribe lectures and detect key topics.
- Applied machine learning algorithms to identify patterns in attention and interaction.
- Enhanced learning experience by providing automated summaries and performance insights.

ACHIEVEMENTS & CERTIFICATIONS

- Smart India Hackathon – Participant (2023, 2025)
- Oracle Cloud Infrastructure Foundations Associate – Scored 95%
- Google Ads for Beginners
- Python 101 for Data Science
